330 Series

For SIGN GRAPHICS

UCJV330-160

Mimaki

Specifications

Item			UCJV330-160
Print head			On-demand piezo head (2 staggered printheads)
Print resolution			600 / 1200 / 1800 dpi
Head gap			3 levels by manual (2.0 mm / 2.5 mm / 3.0 mm)
Ink	Type		LUS-170 / LUS-190 / LUS-200 / LUS-210
	Colour	LUS-170	C, M, Y, K, Lc, Lm, W / C, M, Y, K, Cl, W or C, M, Y, K
		LUS-200	C, M, Y, K, W or C, M, Y, K
		LUS-190/LUS-210	C, M, Y, K, Cl, W or C, M, Y, K
	Capacity		1000ml
Ink circulation			Circulation in damper MCT v2
Max. Printable width			1,610mm (63.4 in)
Media	Max. Width		1,620mm (63.8 in)
	Outer dia.		φ250mm or less
	Max. Load capacity		Standard : 1 roll / Option : 3 rolls (with the Media changer)
	Weight		45kg (99.2 lb.) or less
	Core dia.		2 / 3 inch
Cut function	Cut speed / acceleration		Speed：Max.300 mm/s Acceleration：Max. 0.5G
	Cut pressure		10~450gf
	Cutter response times		10 times /sec
	Repetition accuracy		±0.2 mm (Excluding expansion and contraction of film due to temperature)
Interface			Ethernet 1000 BASE-T(Recommended) / USB 2.0 Hi-speed
Power			Single phase AC100 - 120V±10% /12A or Single phase AC200 - 240V±10% /6A 50/60 Hz ±1Hz
Power consumption			Max.1,440W or less ×1 / 800W (Continuous operation) / 4.5W or less (Sleep mode)
Operational environment	Temperature		20 – 30°C (68–86°F)
	Humidity		35 - 65% Rh (Non condensing)
	Guaranteed accuracy temperature		20 - 25°C (68 - 77°F)
	Dust level		0.15 mg/m³ or less (Equivalent to general office)
Dimensions (WxDxH)			2,890mm x 800mm x 1,480mm (113.8 in x 31.5 in x 58.3 in)
Weight			227kg (500.4 lb)

Print&Cut

Proven cutting functionality supports various output operations

Thanks to the instant-drying nature of UV-curable inks, you can seamlessly perform print & cut operations, expanding your printing possibilities. With just one machine, you can create a wide range of applications, including store decorations, posters, labels, stickers, wobblers and more!

This versatile machine is also equipped with functions to increase efficiency, such as ID cut and zero-margin crop mark functions, which support automatic and continuous cutting of various data while reducing media waste.

⚠ **Inks and substrates:**
• As physical properties of ink (adhesion, weather resistance etc.) are different depending on media, please be sure to have a print test in advance.
• Depending on the application, primers, other surface treatment or surface protection such as lamination may be necessary.

• Some examples shown in this catalog are artificial renderings. • The corporate and merchandise names in this catalog are the trademarks or registered trademarks of the respective corporations. • Specifications, designs and dimensions shown in this catalog may be subject to change without notice for technical improvements. • Inkjet printers use extremely fine dots, so colors may vary slightly after replacement of print heads. • Also note that when using multiple print units, colors could vary slightly from one unit to another due to slight individual differences. • Please note that descriptions and data in this catalog are as of September 2023.

⚠ **Safety notice:**
This product is equipped with UV irradiation equipment.
Please pay attention to the following notes in order to use safely.
• Do not look directly into the UV light source nor place your hand, or expose your skin directly to the UV light source.
• Depending upon print mode, some VOC emittance from printed parts not yet cured and hardened may occur.
• In addition, please be sure to read and follow the instructions and guidelines of the manual carefully.

Give your creativity a Glow up

DB10382-02

Mimaki UV Flagship Model for High Image Quality, High Production, and Application Versatility
UCJV330-160

In addition to high image quality and high productivity, this flagship model is equipped with advanced UV-LED technology that only Mimaki can offer. While inheriting the conventional 2 through 5-layer printing functionality, this is Mimaki's first roll-to-roll product that supports 2.5D printing. This machine is equipped with unique features such as watermark printing, made possible only with Mimaki to meet a variety of needs. Take your sign and graphics to the next level with overwhelmingly high image quality for added value to your business.

Mimaki UV High Image Quality Technology

1 Newly developed ink ejection technology delivers high image quality at high production speed

2 Mimaki Weaving Dot Technology (MWDT) compensates for differences in the individual print heads and minor adjustment errors to suppress banding.

3 Mimaki's unique banding reduction system produces smoother gradients

4 High-density, high-definition UV-LED 330 print heads

5 Smoother image quality with a minimum droplet size of 4pl

Mimaki's UV printers are both user- and environmentally-friendly

UV Printer is Eco-Friendly

UV printers use UV-LED light sources to cure the inks. These lights have low power consumption and a long lifespan, making them environmentally friendly. The UCJV330 is incredibly energy-efficient, consuming about half the power of a typical eco-solvent printer and conserving one-third of the power compared to a typical latex printer. [1]

In this era of global environmental awareness, reducing energy costs is crucial.

※ 1 Company research ; Comparison of maximum power consumption with latex machines in the market

Environmentally-friendly UV inks

The UCJV330-160 uses environmentally-friendly UV ink that generates nearly zero VOCs. [2] [3] It cures without irradiation of short-wavelength UV light, which causes ozone generation.

GREENGUARD Gold Certification
Based on the world's most stringent chemical diffusion standards, the GREENGUARD Gold certification guarantees that the product is suitable for schools and medical institutions.

※ 2 VOC = Volatile Organic Compound
※ 3 Company research ; No VOCs are generated after UV curing. A very small amount may occur during the pre-curing stage.

Mimaki Cloud Technology PICT

The printer's operating status and ink usage can be monitored even when the user is away from the printer. It supports planned operations and lets you see the operational status and performance of Mimaki printers, which can be useful for planning purposes. PICT also enables advanced scheduled maintenance and preparation for ink refills.

- Production control
- Preparing to refill ink
- Planning maintenance time
etc...

Raster Link 7

- 2.5D output data can be easily created with the "2.5D Texture Maker" function.
- Enhanced favorite settings and log pop-ups.

Operate machines remotely
MRA (Mimaki Remote Access)

List ink type, heater temperature, and notification alerts on a smartphone or Windows-based PC.

The machine can be operated remotely with the same feeling as the control panel of the actual machine.

No drying time, allowing for fast delivery

UV ink instantly cures and fixes to substrates when exposed to UV light (ultraviolet light). This allows printed substrates to be post-processed immediately after printing, including laminating and cutting. In addition, UV ink does not require a specific surface type and can print on a wide variety of substrates.

	Day-1		Day-2	
Eco-Solvent (Total 27 hr)	Print (2h)	Dry (24h)		Laminate (1h)
UCJV (Total 3 hr)	Print (2h)	Laminate (1h)		

Saving production time by up to **90%**
Same day delivery is possible

Superior print quality even at high production speed

Expand your creative possibilities and deliver highly profitable print applications with clear ink
2.5D Print (Emboss Print)

UCJV330-160 is Mimaki's first roll-to-roll printer to support emboss printing, commonly featured in our flatbed printers. By applying layers of UV ink, the printer can create uneven surface, allowing you to simulate textures found in oil paintings and wood grains.

Watermark Print

With backlight

Watermark printing reveals the skeleton image when exposed to backlighting. When illuminated from behind, for example, by sunlight or a backlight, it can create a silhouette. This feature offers the ability to craft unique designs that capture attention.

Gloss & Matte Finish

Clear ink adds value to your applications. It can bring textural effects to the surface, enhancing the design. A gloss finish imparts a sense of luxury with sheen, while a matte finish provides an elegant, sophisticated aesthetic.

ARTISTA UV Texture Library

RasterLink7 Software includes 129 texture patterns that can be used as swatches in Adobe Illustrator. Clear ink can be used to add a luxurious frosted privacy screen to office and facility windows.

Range of optional items for an enhanced printing experience

XY Slitter

Inline X & Y-directional cutting is possible. The system reads the dedicated registration marks and automatically cuts the sheets, dramatically reducing labor and optimizing all post-processing.

Media changer

Three rolls of media can be set. Anyone can easily, safely and efficiently switch between media simply by turning the handle.

Ionizer

Eliminates static electricity on the media surface, stopping "nozzle deflection" and dust adhesion caused by static electricity.

Anti-static sheet

Prevents media from sticking, deflection of the media on the post heater, and other media transportation malfunctions caused by static electricity.

End face guide

Prevents end-face snaking on the media take-up. Stable take-up supports high quality printing.

Proofing Light

The light box is mounted on the front of the printer, allowing the operator to check the finished product when printing backlit design and decorative substrates.

Heater Options

Print heater and post heater improves the adhesion of white ink.

Deodorizing Unit

By attaching a deodorizing unit, it is possible to significantly reduced the odor.
